

TECHNICAL REQUIREMENTS

for Triethanolamine

Version № 01 from 28.05.2026

Tradename	Triethanolamine
Chemical formula	Triethanolamine
CAS number	102-71-6
Chemical structure	
Appearance	A clear, viscous liquid that ranges from colorless to dark brown. Or crystals that range from white to brown, with no mechanical impurities. A greenish tint is acceptable
Application	Production of polyurethane foams
Application plant	Nizhnekamskneftekhim

TECHNICAL REQUIREMENTS:

Parameter	Unit of measure	Values
Content:		
Triethanolamine	%	min 99
Water	%	max 0,2
Mass fraction of impurities: - water, monoethanolamine, diethanolamine, triethanolamine, monoethoxylate, unidentified impurities	%	max 1,0
Color APHA	Pt-Co	max 50,0
Package type	-	Barrels 200 kg

Additional requirements:

1. Product must be no change in the color of the liquid, impurities and other components. The supplier must provide a certificate of analysis and a safety data sheet for the product.
2. For the product, the supplier provides a certificate of analysis and safety data sheet. Additional declarations (e.g. Food contact, non-GMO declarations, REACH statements etc) for product should be provided upon request.

Packaging: must exclude damage to the goods or loss during transportation. The packaging must contain information that allows the identification/traceability of the antioxidant lot (name, lot number, production date, gross weight, net weight, manufacturer, country of origin).

Shelf Life: at least 12 months after production date provided if stored according to the instructions in MSDS/SDS.
